ABOUT US

MEVBRIDGE

MEVBRIDGE is a Dubai-based cross-chain company solution designed to optimize blockchain transactions by addressing MEV (Maximal Extractable Value) issues and blockchain fragmentation.

The platform enhances interoperability, security, and efficiency through its consortium-based model.

To create a seamless, secure, and efficient Blockchain ecosystem through enhanced interoperability and optimized transactions

To leverage advanced technologies and strategic partnerships to provide innovative solutions that address MEV challenges and promote Blockchain integration

We value innovation, security, and transparency in our technology. We focus on collaboration, efficiency, and customer-centric solutions, all while maintaining sustainability and integrity in our operations.

About Us

WHAT IS MEVBRIDGE?

MEV (Maximal Extractable Value) is an innovation in blockchain that maximizes profit opportunities. MEV allows for transaction restructuring, so miners and validators can earn additional profits.

This technology is essential in improving the security and efficiency of blockchain networks to support the growth of decentralized ecosystems.

DISCLAIMER ON MEV RISKS (Maximal Extractable Value)

The Miner Extractable Value refers to a statement explaining the potential risks associated with the phenomenon of MEV in the context of blockchain and cryptocurrency. MEV is the value that can be extracted by miners or validators by manipulating the order of transactions within the blocks they mine. Here are some key points typically included in a disclaimer on MEV risks:

Market Volatility

Risks associated with sharp price fluctuations. Transactions processed in the context of MEV may be affected by rapid price changes.

Transaction Manipulation

There is a possibility that miners or validators may manipulate transactions for personal gain, which could harm other users

Loss of Assets

Users may face the risk of losing their assets if their transactions are executed unfavorably due to MEV practices

Lack of Transparency

The processes behind value extraction may lack transparency, making it difficult for users to understand the potential risks involved.

Regulation and Compliance

MEV may attract regulatory attention, and changes in regulations could affect how systems operate.

Technology Risks

Vulnerabilities in smart contracts or blockchain protocols can be exploited by irresponsible parties in the context of MEV.

TRADITIONAL BLOCKCHAIN METHODS

OLD METHODS MINING

Once profitable, but now inefficient due to high costs and block limitations.

OLD METHODS CRYPTO TRADING (Spot, Futures, ETF)

Requires specialized skills and carries significant risks, especially with futures trading.

OLD METHODS STAKING

Has become less popular as it lacks the dynamism that crypto enthusiasts seek.

NEW METHODS M E V CROSS-CHAIN

MEV Cross Chain offers a safer, highly profitable, and innovative approach that remains underutilized in the blockchain world.

MEV MECHANISM

MEV (Maximal Extractable Value) : allows miners/validators to profit by prioritizing transactions within a block.

1

Front-Running

Placing orders ahead of specific transactions.

2

Back-Running

Executing trades following high-value transactions.

3

Sandwiching

Positioning transactions between others for optimal gain.

4

Arbitrage

MEV (Maximal Extractable Value) in blockchain allows validators or miners to profit by reordering transactions to exploit price differences or liquidation opportunities across DeFi protocols, all within the same network.

KEY DIFFERENCES

MEV BOT vs CRYPTO TRADING BOTS

CRYPTO SPOT TRADING BOTS

Based on the buy-low, sell-high strategy. The potential for profit is high if the price rises, but it is still risky

**LOW RISK,
FLUCTUATION ADVANTAGE**

MEV BOT

- ✓ Leveraging blockchain transaction restructuring for additional benefits
- ✓ Uses advanced algorithms to optimize transaction speed and price differences
- ✓ Focuses on consistent earnings with minimal risk.

**NO RISK,
STABLE PROFITS**

CRYPTO FUTURES TRADING BOTS

Take advantage of leverage with LONG/SHORT positions, but the risk of losing all capital is greater

**HIGH RISK,
HIGH RETURN**

SPEED is THE KEY TO MEV SUCCESS

- **Lightning-fast execution**
Transactions are executed in seconds to capture opportunities.
- **Intelligent Algorithm**
Ensure timely transactions to outperform competitors.
- **Cutting-edge Technology**
Provides unparalleled speed and efficiency.
- **Precision Automation**
Guarantees flawless execution and outperforms manual methods.

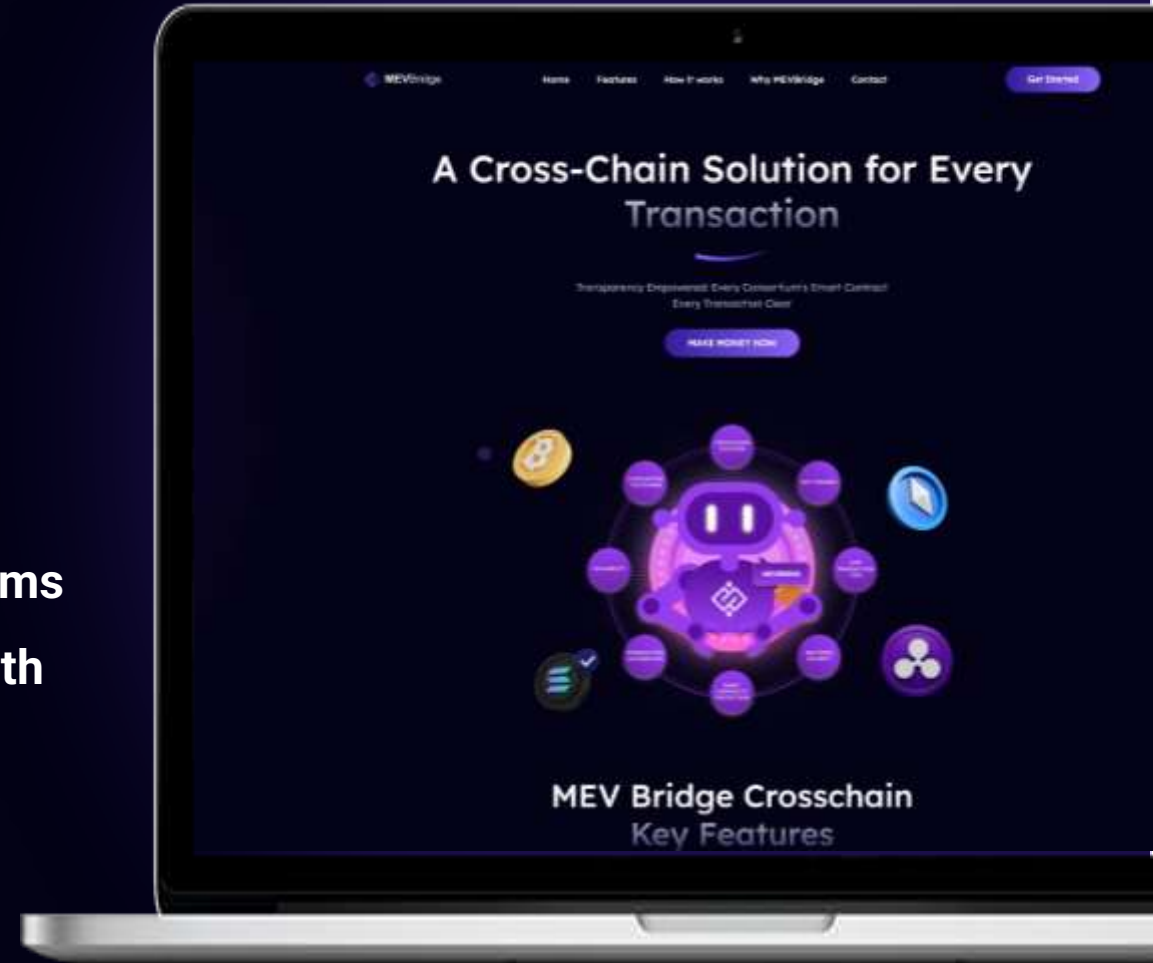

Introduce

MEVBRIDGE

Leading AI BOT MEV CROSS CHAIN solutions

Delivering efficient and secure execution of blockchain transactions, MEVBRIDGE leverages advanced AI algorithms and high-quality smart contracts to ensure compliance with transparency and traceability standards across multiple networks

KEY FEATURES of **MEVBRIDGE BOT**

Real-Time Data Analysis

Identify the best opportunities by accurately analyzing blockchain data.

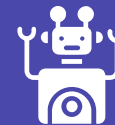

Cross-chain cost optimization

Reduce transaction costs through efficient cross-chain evaluation

Automatic Termination

The bot automatically stops operations if conditions are unfavorable, protecting users' assets

High Execution Speed

Advanced technology ensures transactions are made in seconds to capture optimal opportunities.

With this innovation, MEVBRIDGE brings unparalleled blockchain connectivity, opening up opportunities for profit and efficiency in the decentralized ecosystem.

MEVBRIDGE

BUSINESS ACTIVITY

① **Developing and Enhancing Cross-Chain Bridge Technology**

- ✓ Innovation Continuously innovating and improving the platform's cross-chain bridge technology to ensure robustness security, and efficiency
- ✓ Integration Incorporating new blockchain networks and protocols to expand interoperability and functionality
- ✓ Optimization: Streamlining processes to improve transaction speed and reduce costs, ensuring optimal performance

② **Collaborating with Consortia and Blockchain Networks**

- ✓ Partnerships: Building strategic partnerships with other blockchain networks and consortia to enhance the platform's capabilities.
- ✓ Joint Ventures Engaging in joint ventures to co-develop and implement new features and services.
- ✓ Community Building: Actively participating in blockchain communities to foster collaboration and drive collective growth

LIFESTYLE BONUS PROGRAM

Rewards:

- **1% of global sales** is distributed monthly to all Lifestyle Bonus qualifiers.

Additional Feature:

- **72-hour countdown timer** will appear in your Backoffice, starting immediately after registration. The timer will be visible each time you log in within the first 72 hours

Point One

Enroll 3 new members with a minimum of \$100 within the first 72 hours of registration.

Point Two

Note: You can qualify with a smaller package (e.g., \$28), but you won't receive Lifestyle Bonus shares until upgrading to \$100.

WEEKEND BONUS & MATCHING 100%

1% Global Pool distributed every Friday, based on total sales

Option 1 : Recruit **three direct referrals** with a minimum plan of **\$100** between **00:00 Friday** to **23:59 Thursday**.

OR

Option 2 : Help your three direct referrals qualify during the week, and you're automatically eligible.

Share Allocation

- \$100 – \$499 = 1 Shares
- \$500 - \$999 = 2 Shares
- \$1,000 – \$4,999 = 3 Shares
- \$5,000 – \$9,999 = 4 Shares
- \$10,000 and above = 5 Shares

100% Matching Bonus : Valid for every eligible referral.

How it works

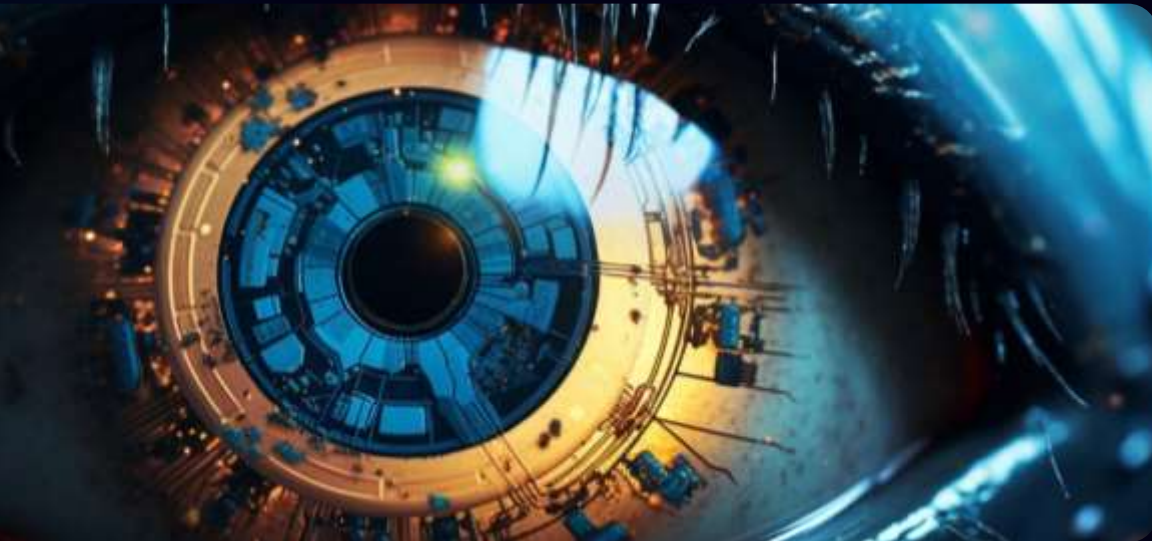

When you recruit three direct referrals or help three of your direct referrals qualify for the Weekend Bonus, you will earn a 100% matching bonus from all eligible referrals.

Important Note:

Dynamic Compression applies, ensuring maximum payouts for you.
